

## Appendix C.

### Number of outcomes used in evaluations by framework level and domain

Outcome levels, domains, and sub-domains	Definitions	Count
<b>Level: Participant outcomes</b>	Outcomes that assess individual participants' attitudes, beliefs, and/or well-being	188 (27.1%)
<b>Domain:</b> Relationship attitudes/beliefs/knowledge	General attitudes, beliefs, and knowledge that participants hold about romantic relationships, such as beliefs about cohabitation, attitudes toward (pre)marital counseling, dating violence acceptance, and conflict management skills	104
<b>Domain:</b> Physical and psychological well-being	Outcomes related to physical and psychological well-being among participants, such as depressive symptoms, anxiety, and general health	59
<b>Domain:</b> Reproductive health attitudes/ beliefs/ knowledge/behaviors	General attitudes, beliefs, and knowledge that participants hold about reproductive health and family planning, such as attitudes toward sexual activity and pregnancy intentions, as well as behaviors such as current birth control use	16
<b>Domain:</b> Parenting attitudes/beliefs/knowledge	General attitudes, beliefs, and knowledge that participants hold about parenting, such as attitudes about discipline, knowledge about child abuse, and beliefs about the importance of marriage for children	9
<b>Level: Romantic relationship outcomes</b>	Outcomes that focus on specific romantic relationships, such as relationship status, communication between romantic partners, or partners' feelings of support and affection	354 (51.1%)
<b>Domain:</b> Romantic relationship quality	This is the broad categorization of outcomes that are frequently associated with healthy (or unhealthy) relationships; it is comprised of the seven sub-domains described below	323
<i>Sub-domain:</i> Communication and conflict	Outcomes focused on communication and conflict behaviors such as conflict management, problem solving, destructive conflict behaviors, and emotional awareness	112
<i>Sub-domain:</i> Global rating of relationship quality or satisfaction	Broad measures of relationship quality, satisfaction, functioning, and happiness	82
<i>Sub-domain:</i> Intimate partner violence (IPV)	Outcomes measuring intimate partner violence, including physical and sexual violence, stalking, and psychological abuse by an intimate partner	47
<i>Sub-domain:</i> Commitment to and confidence in relationship	Outcomes assessing how dedicated or committed partners feel to the relationship, their confidence in the relationship's future, or their assessment that the relationship is in trouble	34
<i>Sub-domain:</i> Other feelings about partner or relationship	Outcomes measuring individuals' feelings toward their partner or relationship, such as warmth, trust, intimacy, and forgiveness	27

Outcome levels, domains, and sub-domains	Definitions	Count
<i>Sub-domain:</i> Non-communication behaviors	Outcomes examining non-communication behaviors, such as infidelity, regularly spending time together, and having positive intentions	10
<i>Sub-domain:</i> Specific areas of (dis)satisfaction or (dis)agreement	Areas of (dis)satisfaction and (dis)agreement within the romantic relationship, such as finances, sex, and role orientation	11
<b>Domain:</b> Romantic relationship status or stability	The status of the partners' romantic relationship, such as whether they are in a relationship, living together, or have gotten married or divorced; also includes outcomes assessing relationship stability (e.g., staying together/married) or instability (e.g., breaking up/divorcing)	31
<b>Level: Family outcomes</b>	Outcomes that focus on relationships and behaviors within the family or the well-being of the family unit	135 (19.5%)
<b>Domain:</b> Parenting	Outcomes assessing parenting behaviors, such as positive discipline, father involvement with children, and parental responsiveness to children	41
<b>Domain:</b> Coparenting	Outcomes focused on the relationship between the two coparents, such as shared responsibility, the coparenting alliance, and coparenting conflict	23
<b>Domain:</b> Family economic outcomes	Outcomes measuring the family's economic well-being, such as difficulty meeting housing costs, parents' employment status, receipt of Temporary Assistance for Needy Families (TANF) or food stamps, and father's financial support	28
<b>Domain:</b> Child development	Outcomes measuring children's development, such as behavioral problems, social competence, cognitive performance, and hyperactivity	21
<b>Domain:</b> Child physical and psychological well-being	Outcomes related to physical and psychological well-being among children, such as depressive symptoms, anxiety, and general health	5
<b>Domain:</b> Other family outcomes	Family-level outcomes that did not fit in any previous categories, such as child's bedtime routine, whether the father lives with the child, and parents' substance use	17
<b>Level: Community and society outcomes</b>	Outcomes beyond the family, such as connections to social supports, use of community resources, the local divorce rate, or the state child poverty rate	16 (2.3%)
